

Juniper Apstra Multi-vendor Datacenter Solution for reliable operations

1

Independence from CLI

Juniper Apstra is EASY. There is no need to learn new CLI commands. Based on templates, the system maintains a consistent, streamlined operational model across all infrastructure.

2

No vendor Lock-in

Apstra unifies operations over diverse underlying infrastructure. Protect existing hardware investment, make your suppliers compete, and innovate without constraints

3

Lower CapEX and OpEX

Multi-vendor support reduces CapEx and mitigates supply chain disruptions. Intuitive, template-based system simplifies Day 0/ 1/ 2+ management, freeing up operators from the day-to-day toil.

“Juniper Apstra provides a single point of management across different infrastructure vendors, giving us the freedom to innovate and not lock us in.”

Darko Petrovic
Principal Engineer, Advania Iceland
